PREFACE

This volume, completing the forty-first year of the Industrial Arts Index, cumulates the monthly issues published from December 1952 to and including November 1953. No new periodicals were added during this period, and none were discontinued. Changes of name and other changes were noted as they occurred in the announcement pages of the monthly numbers of the Index and in the List of Periodicals Indexed.

The year was saddened by the passing away in June 1953, of Marion E. Potter, the H. W. Wilson Company's first employee and the first editor of the Industrial Arts Index, who continued her activity in the work to which she had contributed so much, until her last illness.

During the year, Elsa Toom, Mary B. Turner and Samuel C. Sager became members of the staff.

We owe an ever increasing debt of gratitude to Doris Dart for her contribution to the chemistry and physics indexing.
